

Technical Data

FEED GRADE CALCIUM CHLORIDE MINI GRANULAR

CAS No. 10043-52-4

Formula CaCl₂

Product Description Appearance is a white solid mini granule prill. Calcium Chloride (CaCl₂) is a feed material for animal nutrition. Calcium chloride fed to transition cows acts as a cation-anion balance and provides proper calcium.

Nutrient Properties	Specification	Typical
Calcium, as Ca, wt %	34.00 Minimum	34.05
Chloride, as Cl, wt %	60.00 Minimum	60.18
Calcium Chloride, as CaCl ₂ , wt %		94.20

Physical Properties

(cumulative % retained)

Retained on a #12 Screen, %	1.70 mm	19.10
Retained on a #14 Screen, %	1.40 mm	4.90
Retained on a #16 Screen, %	1.18 mm	25.60
Retained on a #20 Screen, %	0.85 mm	25.40
Retained on a #30 Screen, %	0.50 mm	15.10
Retained on a #100 Screen, %	0.15 mm	9.90

Packaging Options

50 lbs poly bags
2000lb bulk bags
