

Technical Data

AMMONIUM CHLORIDE

FEED GRADE

CAS No: 12125-02-9

General Feed grade ammonium chloride is a high purity and hygroscopic mineral. Appearance is a white crystal. Ammonium chloride is a cation-anion supplement for transition dairy cows.

Nutrient Properties	Specification
Ammonium Nitrogen, as $\text{NH}_3\text{-N}$, wt %	25.60 Minimum
Equivalent Crude Protein from Nonprotein Nitrogen, wt %	160.00 Minimum
Chloride, as Cl, wt %	66.00 Minimum
Ammonium Chloride, as NH_4Cl , wt %	99.00 Minimum
Heavy Metals Total, ppm	5.00 Maximum
Arsenic, as AS, ppm	2.00 Maximum
Cadmium, as CD, ppm	0.50 Maximum
Lead, as Pb, ppm	5.00 Maximum

Appearance White crystalline powder

Packaging Options 25 kg Bag
