MANGANESE SULFATE

MONOHYDRATE

GRANULAR

FORMULA: $MnSO_4 \cdot H_2O$

GUARANTEED ANALYSIS

Manganese (Mn) 31.5%
31.5% Water Soluble Manganese
Sulfur (S) 18.5%

DIRECTIONS FOR USE

Manganese Sulfate is recommended for correction of manganese deficiency. Manganese sulfate fertilizer is very soluble and is the most effective source of manganese for soil application.

CAUTION

Harmful if inhaled or swallowed. Do not get in eyes, on skin or clothing. Keep away from children and animals.

APPLICATIONS

Apply agronomic application rates suitable for the geographical area or the maximum allowable non-nutrient application rates per acre.

Soil: Broadcast 20 – 60 lbs. / Acre pre-plant or at planting. For side dress application use 10 – 20 lbs. / Acre. For improved results apply with ammonia sulfate.

Applications to actively growing plants just before full leaf expansion with water will produce best results.

FIRST AID

Immediately flush eyes and skin with plenty of water for at least 15 minutes. If continued irritation get medical attention. If inhaled move to fresh air. If swallowed induce vomiting immediately with water. Seek medical attention. Never give anything by mouth to an unconscious person.

STORAGE AND DISPOSAL

Store in a cool dry area out of reach of children and animals. For spill sweep up with minimum dust. Dispose of in accordance with Federal, State and local regulations.

KEEP OUT OF REACH OF PETS AND CHILDREN.

Net Wt. 50 LBS (22.68 Kg)

PRODUCT DESCRIPTION:

Appearance is a pale pink granular prill. Manganese sulfate is a high-quality inorganic compound, commercially significant source of manganese.
