

Technical Data

CALCIUM SULFATE DIHYDRATE POWDER

Feed Grade

CAS No. 10101-41-4

Formula $\text{CaSO}_4 \cdot 2\text{H}_2\text{O}$

Product Description Appearance is a white powder. Calcium Sulfate is a high-quality, inorganic compound, commercially significant source of calcium and sulfur.

Nutrient Properties	Specification	Typical
Calcium Sulfate Dihydrate, as $\text{CaSO}_4 \cdot 2\text{H}_2\text{O}$, wt %	90.0 Minimum	92%
Calcium, as, Ca, wt %	20.5 Minimum	
Sulfur, as, S, wt%	16.5 Minimum	

Physical Properties (cumulative % retained)		
Passes on a -80 mesh, %	0.18 mm	99%

Bulk Density 1.85 g/cm³

Packaging Options 50 lbs multi-wall polylined bags
2000lb bulk bags
Bulk
